

Congratulations and Sincere Thanks to
Edward G. Hughes
for Making a Commitment on August 24, 2011
In Memory of Ellsworth Rose
to Carbondale's History by Becoming a Member of the
FRIENDS OF D&H CABOOSE 35964

From October 9, 1829, when the first shipment of anthracite coal went up Plane No. 1 out of Carbondale, headed for Honesdale, over the Delaware and Hudson Canal Company's Gravity Railroad, to the present, railroading has been an important part of life in Carbondale.

D&H Caboose 35964 is not only a symbol of 181 years of railroading in Carbondale and the Lackawanna Valley, it can become, at the same time, the key to unlocking and capitalizing on that rich history through heritage tourism.

The Carbondale Historical Society and Museum, Inc. and the City of Carbondale are proud to have brought home D&H Caboose 35964. If all of us, present and former residents of Carbondale, from all walks of life, come together to preserve this important railcar from Carbondale's historic past, we can create a bright future for D&H Caboose 35964 and for the Pioneer City.

S. Robert Powell, Carbondale Historical Society

Justin M. Taylor, Mayor of Carbondale
